

HIGH VOLTAGE INSULATION TESTER

INA-6020kV 20kV

The INA-6020kV High-Voltage insulation tester is a truly portable device that allows the measurement of insulation resistances using test voltages up to 20 kV.

It employs a state-of-the-art technology for the safe measurements of insulation resistances up to 4,000,000 M Ω with four test voltages: 5kV - 10kV - 15kV and 20kV.

This equipment is specially well suited to test isolation resistances in transmission lines and medium voltage distribution systems, whether aerial or underground.

Features:

- ✓ Insulation test up to 4 T Ω
- ✓ 4 test voltages: 5kV - 10kV - 15kV - 20kV
- ✓ Guard terminal
- ✓ Multiple scales for accuracy improvement
- ✓ Portable, accurate & rugged
- ✓ IP65 protection (with closed lid)
- ✓ Rechargeable battery
