KL SERIES KELVIN TEST LEAD SETS

For use with Digital Low
Resistance Ohmmeters

Tinsley KL series kelvin lead sets are for use with 4 wire Digital Low Resistance Ohmmeters (DLRO's) requiring test leads that allow the easy connection of current and voltage sense leads to the test subject. This is achieved using only two connectors, allowing accurate low (m/μ Ohm) resistance measurements to be made.

Tinsley has developed a series of hardwearing quality test leads with Kelvin Alligator Clips and 'C' - Clamps in various lengths suitable for heavy duty use to make DLRO measurement connections easier.

Adaptions and connections can be accommodated for client special requirements.

Features:

- ✓ Available in three styles of Kelvin Clip
Medium and Large Alligator Clip
and a C- Clamp
- ✓ 4mm Gold-plated Banana plugs as standard
- ✓ Test Current ratings 10 – 25 Amps
- ✓ Lead lengths available 3m to 20m.
